**DETAILED ACTION**

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The Applicant argues that the Koch and Aleksoff prior art fail to disclose a **tilted grating tap as well a fused fiber PM coupler** coupled to the light source and the Bragg grating for **tapping a signal representative of the light supplied to the grating and a signal representative of the light reflected or transmitted by the grating**; and, a feedback circuit **responsive to the tapped signals** for adjusting the wavelength  $\lambda$  of the light source. The argument is persuasive and therefore claims 11 and 14 are allowed over the prior art.

Claims 2-6, 10, 12-13, and 15-23 have been found allowable due to their dependency on claims 11 and 14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
